Letter carriers tell Phoenix: "Enough is enough!" on crime

On April 6, 2023, President (sic) Billed the Postal Service Reform Act into law, repealing USPS's unfair pre-funding mandate, mandating six-day delivery and creating the Postal Health Benefits Program (PSBP) which will cover active letter carriers and their families. The act also provides USPS employees with the benefits the Postal Service (NALC) is the only federal agency or private company required to meet this burden to such an extent.

The law will increase savings for the Postal Service in the approximately 20 percent of postal retirees who are below average, but not eligible to receive Medicare Part A. This provision ensures that these federal workers will have access to the same health coverage as their civilian counterparts.

For retirees and active letter carriers 64 and older

NALC President Brian R. Renfroe spoke at the Phoenix rally. "Postal inspectors and postal police officers work diligently to investigate and prevent instances of violence. However, the only way to truly protect letter carriers is to prosecute those who violate the law. This should not be.

NALC has been at the forefront of trying to strengthen and preserve letter carriers' employer, the United States Postal Service and its employees.
